

REINIEL DAN A. PABLO

SOFTWARE DEVELOPER | DATA ANALYST | AI PRACTITIONER

Pampanga, PH • (+63)976-208-8422 • reiniel@gmail.com • GitHub: github.com/reidan22

SKILLS

Backend Development: Python, Django, Flask, FastAPI, Node.js, REST APIs, GraphQL, Microservices, Test-Driven Development (TDD), Pytest, Jest

Frontend & Web: JavaScript, React, Vue.js, Bootstrap, HTML5, CSS3, Markdown

Data Analysis & Infrastructure: Presto SQL, PostgreSQL, Data Pipelines, Apache Superset, Apache Zeppelin, Apache Spark, AWS (S3, Lambda, EC2), Terraform, Jenkins, Docker

Tools & Methodologies: Git, GitHub, GitLab, Bitbucket, Jira, Confluence, Technical Project Documentation, AI Collaboration Tools (Claude Code, Gemini, GitHub Copilot, OpenAI Codex), Agile Scrum, Waterfall

Core Competencies: Advanced Problem Solving, Critical Thinking, Technical Instruction, Team Leadership, Cross-functional Communication, Attention to Detail

PROFESSIONAL EXPERIENCE

SOFTWARE DEVELOPER - BACKEND

September 2022 - Present

Sharesource | Metro Manila, PH

Biarri Networks | AUS

- Engineered and scaled custom internal backends used by consulting design units, deploying robust **REST APIs** and managing automated multi-repository scripts within active **Agile Scrum** environments.
- Maintained over **60+ repositories** of exclusive proprietary internal custom **Python** packages and integration libraries across **Bitbucket** and **GitHub**, enabling continuous data synchronization between stakeholders and downstream tools.
- Configured **Jenkins** pipelines for comprehensive job management, managing cron rules and automated scheduled workflows for complex packages and multiple code repositories.
- Executed high-ticket requirement delivery work under tight production constraints, deploying critical infrastructure hotfixes and optimizing webhook execution pipelines to protect system availability metrics.
- Tracked and processed feature tasks using **Git** version control, **GitHub** workflows, **Jira** trackers, and extensive **Confluence** project documentation to maintain structured development history.
- Pioneered **AI automation** workflows by orchestrating advanced agents including **Claude Code** and **OpenAI Codex** models to programmatically generate boilerplate endpoint routes, accelerate integration testing scripts, and eliminate manual developer workflows.

PART-TIME COLLEGE INSTRUCTOR

February 2023 - July 2023

STI College - Angeles City Campus

Angeles City, PH

- Delivered full programming lectures to 15-student cohorts, providing actionable technical examples mapping full-stack **JavaScript** architectures to **Python** data handling frameworks.
- Guided student groups through capstone completions, reviewing syntax architectures and teaching delivery workflows spanning the **Waterfall** model and **Agile Scrum** environments.
- Evaluated student coding submissions, administering comprehensive documentation guidelines and demonstrating practical debugging processes.

DATA VISUALIZATION CONSULTANT / DATA ANALYST

August 2022 - February 2023

Amihan Global Strategies

Metro Manila, PH

- Served as the Data Analyst technical lead, delegating complex reporting tasks, managing project documentation records, and engineering analytical dashboards inside **Apache Superset**.
- Utilized **Python** scripts alongside **Presto SQL** and **PostgreSQL** queries to integrate **REST APIs**, ingest massive raw JSON/XML telemetry arrays, and manipulate data streams.
- Formulated summary production pipelines leveraging **Apache Zeppelin** notebooks and large-scale **Apache Spark** distributed cluster computing configurations.
- Assembled custom interactive layout visual structures applying embedded Markdown styles, **HTML** elements, and **CSS** classes.

SOFTWARE ENGINEER

August 2019 - February 2022

Denso Techno Philippines Inc.

Metro Manila, PH

- Constructed full-stack enterprise solutions entirely from scratch using **Python (Django, Flask, FastAPI)** to design highly scalable **REST APIs** and **JavaScript (React, Node.js, Vue.js, Bootstrap)** for frontends.
- Provisioned secure microservices topologies using **Docker** containers deployed across fundamental **AWS** resources (**S3, Lambda, EC2**) and integrated third-party data streams using automated **Terraform** templates.
- Practiced strict **Test-Driven Development (TDD)** principles, implementing comprehensive automated software validations using **Pytest** and **Jest** to achieve a verified **98-100% QA clearance rate** on all integration contracts.
- Formulated verification suites, authored technical testing specifications, and maintained strict code version control utilizing **GitLab** workflows inside **Agile Scrum** sprints.
- Designed and refined highly aesthetic, responsive user interfaces perfectly corresponding to client specifications and layout frameworks.

IC DESIGN ENGINEER

October 2018 - April 2019

Synkom IC Technology Inc.

Metro Manila, PH

- Formulated detailed hardware layout specifications, design schematics, and structural assembly instructions based on electronics engineering and electrical circuit logic theory.
- Wrote automated data parsing scripts using **Python, TCL**, and **Bash** to clean and ingest raw hardware verification telemetry logs.
- Analyzed performance log trends, recording anomalies and visualizing resultant electronic data sets through **Python** visualization libraries and Microsoft Excel.

ACADEMIC INSTRUCTOR

June 2017 - August 2017

AMA Computer College - Angeles City

Angeles City, PH

- Instructed beginner and advanced Mathematics modules to blocks of 30 Senior High School students, incorporating **Python** algorithms to illustrate mathematical modeling.
- Delivered lectures and moderated structured classroom discussions designed to stimulate logical reasoning, critical thinking, and code-adjacent logic.
- Analyzed student performance logs and academic metrics to track student progress, coordinate curricular evaluations, and document recommended program improvements.

EDUCATION

Bachelor of Science in Electronics and Communications Engineering

Graduated April 2017

AMA Computer College - Angeles City

Angeles City, PH

- Clark Development Corporation - Student Excellence Awardee
- Professional Regulation Commission April 2018 Boards Passer
- Licensed Electronics Engineer and Electronics Technician

SEMINARS AND TRAININGS

Building Python Web Applications with Flask

December 2021

MACH by DICT

Online

Eskwelabs - Data Science Bootcamp (Cohort 7 Fellow)

May 2021 - August 2021

Eskwelabs

Online

- Awarded Best in Project Management & Best Project for Sprint 4
- **Capstone Project (Check-App)**: Developed a Clinical Decision Support System chatbot using **Flask** and **NGROK** on Messenger that triages clinical symptoms and maps patients to medical specialists (ENT, Neurology, Ophthalmology).
- Engineered NLP extraction models via **SpaCy/SciSpaCy** and unsupervised **Gensim LDA** topic structures over 7,300+ clinical rows (scraped with **BeautifulSoup/Selenium**), training a **Logistic Regression** pipeline to achieve a **94% F1-score**.
